BERSERK - INU

Berserk Inu

The project team of Berserk Inu, formed by Griffith, Judeau Falcon and Guts, got together early September 2021. While the Inu rage was on full steam they also felt that most of the projects on BSC or ERC chain were merely focused on earning a quick buck. Or, better said a pump and dump scheme, instead of actually using their teams' competences to provide actual utility.

Utility has a very broad perspective in the dynamic world of crypto, focus of the Berserk Inu team is to produce a Play 2 Earn (P2E) game in which holders of the Berserk token can earn extra tokens by playing the game.

Launch and status

Berserk Inu stealth launched on ERC20 on October 25 (see #1 in the image on the right). After a successful first few days, initial marketing round 1 was launched to spread the word about the project (see #2). During that week of marketing the project quickly grew to around 300 holders. November 6 was the day Berserk Inu listed on Coingecko (see #3) and in less then 24 hours later also Coinmarketcap was a fact.

As you can see this boosted the project popularity, the total number of holders is since then between 700 and 800. #4 Is the last marketing round, which was requested by some loyal members of the community.

The project team is always in good connection to their community and has listened very carefully to their needs. A lot of influencers were booked on request of the community to get more traction. At this moment Berserk is preparing their core product, Play 2 Earn game, so the project will have some good news to share in Marketing round 3.

Whitepaper v 1.0
November 20, 2021

What Is Play2Earn (Play-to-Earn)?

Play2Earn (play-to-earn) games refer to the concept of gaming in which a platform provides its players with a chance to earn any form of in-game assets that can be transferred to the real world as a valuable resource.

As technology has become more accessible to the general public, video game business models have developed to a whole new level. Previously, games could only be played on arcade machines in specific gaming arenas. Gamers would battle for the highest score with a sack full of quarters. However, things changed drastically as the revolution in technology brought games to our smartphones, home computers, and gaming consoles such as PS5, Xbox, and so on.

Now, the world is seeing a new gaming model known as play2earn, specifically in the blockchain universe. It effectively gives players a chance to generate revenues by participating in games. Players create value for other gamers and developers by engaging in the in-game ecosystem and earn assets for their contributions. These digital assets might range from coins to accessories that have been tokenized on the blockchain.

Wikipedia

Berserk Inu is inspired on the original Japanese manga series. Wikipedia says "Berserk (Japanese: ベルセルク, Hepburn: Beruseruku) is a Japanese manga series written and illustrated by Kentaro Miura. Set in a medieval Europe-inspired dark fantasy world, the story centers on the characters of Guts, a lone mercenary, and Griffith, the leader of a mercenary band called the "Band of the Hawk".

See https://en.wikipedia.org/wiki/Berserk_(manga)

The Game

Inspired by the fierce and strong character of Berserk the project team took a trip down memory lane. The team members of Berserk Inu are mid-aged and have had a proven track record in the gaming industry. Games which came back to mind during the brainstorm sessions are Prince of Persia, Dungeons and Dragons, Gods, Metal Warriors but above all a big smile turned up on all faces when Streetfighter was named. It didn't took much time before the team knew what the project should be about! A fighting game where Streetfighter meets Berserk.

Players who hold an NFT of Berserk and have Berserk tokens on their wallet (Metamask or Trustwallet for now) can connect to the Browser based game. Players can choose to fight 1 vs 1 and select a background arena. In version 2 of the game the goal is to implement teamplay in next where 2 vs 2 is an option. Players of the game stake a set amount of tokens which makes the prize money to be won.

The winner of the duel will take the earnings of this battle back to their wallet. A small fee is deducted from the prize money to fund future development of the game.

During the battle, players can fight with various kicks, jabs and punches. As soon as one of the energy bars of the players has ran out that players loses the match. We have a winner!

Roadmap

Phase 1

- Berserk Inu Stealth launch
- Marketing Top Influencers
- Coingecko listing
- Coinmarketcap listing
- Whitepaper release
- Website rebrand

Phase 2

- More marketing
- Roadmap update
- Certik Audit
- Berserk Development
- 1000 Holders
- 3M+ Market Cap reached
- List Major CEX Exchange

Phase 3

- Game Concept
- NFT Collection
- NFT Marketplace
- 5000 Holders
- Make Partnerships
- Berserk Merch
- Intense Marketing
- Berserk Cross-Chain Wallet

How to buy

1 Download the free Trust Wallet app, or get Metamask in Chrome browser. For Metamask users detailed information on their site.
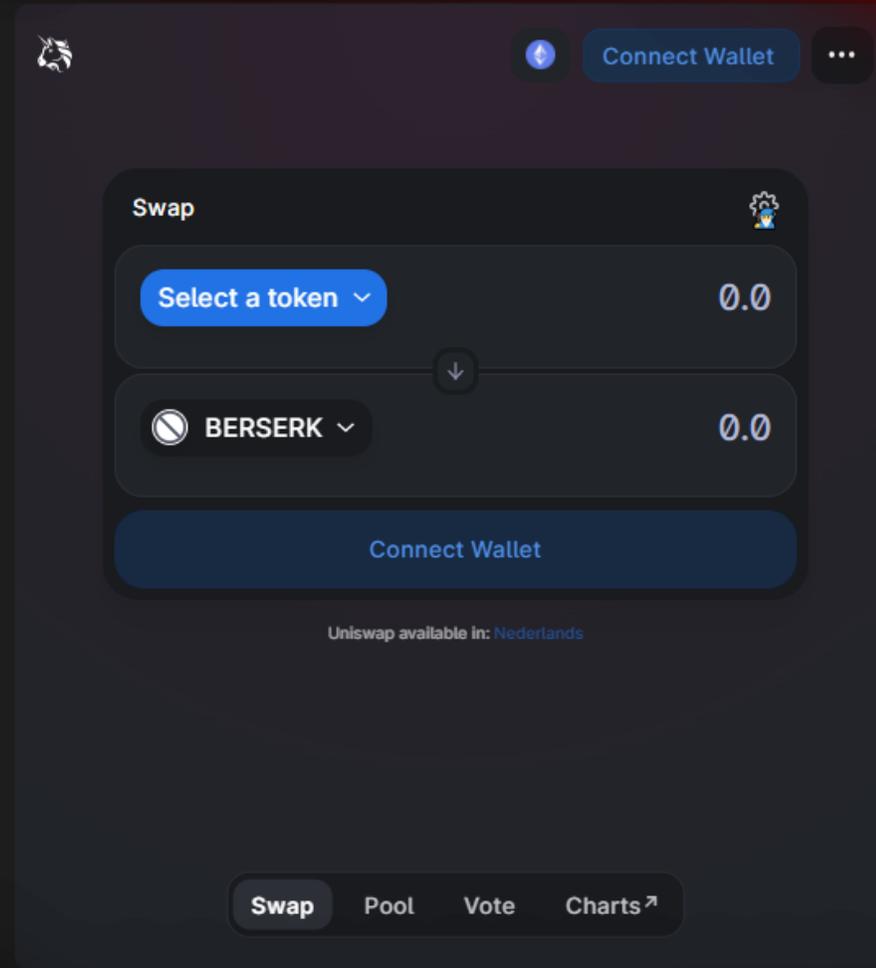

2 Purchase ETH

3 Trustwallet: Go to the DApps tab at the bottom, and find Uniswap. Iphone users may need to enable the trust browser, then use the browser tab. Your can also click the BUY NOW button on our website if you're not on mobile.

4 Trustwallet: Click Select a currency and enter this contract address into the search field, and you should be able to find $BERSERK Token. 0x55ae8e43172e91fab2a9e97636023f4c87b4c470
